

Subject: Professional SCADA-IT Field Engineer

- Employed by the Technical Manager, the figure we are looking for will be called upon to manage the development and integration of SCADA, PLC, HMI applications for automatic machines / systems and the subsequent testing / commissioning / start-up at the end customer.
- In coordination with the Technical Manager, he will personally and independently follow the solutions projects, raising the quality and standardization levels of the entire control part of the machines on the basis of the performance and cost-saving objectives agreed with the management . The role includes constant contact with the internal functions involved in the development of products / services and / or project management.

The ideal candidate is in possession of the following requirements:

- Bachelor's / Master's degree in computer science or computer engineering or Automation and Robotics (equivalent experience in the same role can possibly replace the degree);
- Experience in programming and configuring SCADA software packages, PLC platforms, OPC DA and UA protocols;
- Experience with Microsoft operating systems, MS SQL Server DB, VB Script and VB .NET programming language;
- Experience in the design and integration of Ethernet / Profinet networks;
- Experience in configuring VPN and VLAN networks;
- Knowledge of Rockwell Automation and Siemens PLC / HMI platforms is welcome;
- Knowledge of English (intermediate level);
- Willingness to work abroad for at least 90 days a year;
- Predisposition to interpersonal relationships;
- Adequate communication skills;
- Predisposition to work in a team;
- Passion, curiosity, open and flexible mindset;
- A keen interest in personal growth
- Residence preferably located within a radius of 30 km from the workplace.
